

WHAT ARE CREDIBLE SOURCES?

- 01** The information is current.
- 02** The source is relevant to the specific research you are doing.
- 03** The publication is trusted in the subject matter area you are researching.
- 04** All sources that are cited by the author are unbiased, precise and not difficult to locate.
- 05** If it's a web source, the URL and layout represent validity and trustworthiness.
- 06** The author has multiple years of expertise in the subject matter area. They should be reputable.
